## (C)   AMENDMENTS TO THE CLAIMS

Please cancel claims 8 - 13.

1.   (ORIGINAL)  A computer consumable component employed with an associated computerized apparatus, comprising:

the consumable component;

incorporated with the consumable component, a memory; and

embedded in the memory, readable program code containing at least one downloadable, upgrade version of program code associated with a device selected from a group including, the consumable component, the associated computerized apparatus, and interactional program code associated with both the consumable device and the associated computing apparatus.

2.   (ORIGINAL)  The invention as set forth in claim 1, the memory further comprising:

an electrically readable device.

3.   (ORIGINAL)  The invention as set forth in claim 1, the memory further comprising:

an optically readable device.

4.   (ORIGINAL)  The invention as set forth in claim 1 the memory further comprising:

a magnetically readable device.

5.   (ORIGINAL)  The invention as set forth in claim 1 the readable program code further comprising:

interactive subroutines for allowing selection of options for installation, operation, or both, of said readable program code.

1    6.    (ORIGINAL)  The invention as set forth in claim 1 further comprising:

2         program code for determining if the readable program code is compatible with

3    the associated computerized apparatus and, if not, program code for aborting any

4    downloading of the readable program code.

5    7.    (ORIGINAL)  The invention as set forth in claim 1 the readable program code

6    further comprising:

7         program code for indicating whether the readable program code is a partial listing

8    or a complete listing of an upgrade version thereof.
